

Full Name	Callum Roper
Year of Study	3
Rep Role	Campaign Network – Community Officer
What has been worked on in the past month?	In the last month I have been engaging with students online joining the cook alongs. On top of this I have been working to pass on your feedback on issues important to you whether that be on housing or moving over the festive period. Additionally, I have made some progress on working to make students feel safer in town.
Successes from the past month and any Reps Wins	I have had some positive conversations with councillors in regards to issues where students feel unsafe around the city, seeking to ensure positive community engagement between the student body and local stakeholders. Additionally, I have had the pleasure to work on the Asymptomatic testing station, this is part of the process to ensure students get home for Christmas safely. By the time you read this you should be home and I wish you a Merry Christmas and a very happy New Year!
Plans for next month	I will be taking a break over Christmas to recharge my batteries but please do get in touch if you have any community issues and I'll get back to you ASAP. I will be working to build on the conversations with councillors to pass on Student concerns in regards to safety around town. Finally, I look forward to sharing the new map we are launching in the new year which will provide a variety of local businesses and traders, it will be a great resource for students in the new year.
