

Volunteer Officer Report October 2019

Katie Sian Louise Smith

What has been worked on in the past month?

Student engagement has been worked on heavily in the last month, trying to recruit more reps throughout all years. A trial in production in level 2 journalism on beats is being tested until Christmas. Trying to solve IT problems within the news room has been a big effort. NSS action plans have been drilled to us in meetings and getting student feedback to make it better.

Successes from the past month and any Reps Wins

Loads of reps putting themselves forward. Monthly meetings with the head of school, programme leader, and other module coordinators wanting their input to me and make things better. Module having its own form of module evaluations as wanting to work closely with a speak week.

Plans for next month

Sort out IT problems that still haven't been sorted out. Sort out my reps lists that I still can't access. See if new shorthand classes work.
