

<b>Full Name</b>	Cameron Wiles
<b>Year of Study</b>	3
<b>What has been worked on in the past month?</b>	<p>This month the main focus has been the election of course reps within our school. With only half the positions filled after the elections, this was a challenge that looks to be getting resolved. Hopefully, this will help open communication channels across the school. The communication lead and I have resolved the mess which has existed with the reps now so this can start to move forward. This was challenging as the communication between us didn't exist creating a problem of too many cooks.</p> <p>Other activity this month was my attendance to a college meeting where we spoke about EDI and I suggested the possibility of having EDI reps within our schools. This is something our head of school and education leaders were keen on and are looking into moving forwards.</p>
<b>Successes from the past month and any Reps Wins</b>	<p>The reps who have been voted in have been pro-active and started talking to their respective cohorts. I have been encouraged by their use of the system and feedback to the staff which has been received excellently and acted upon from my perspective. As this relates to the reps is built more I will have a clearer view.</p> <p>We also saw a lot of our feedback from last month acted upon with a lot of skill workshops introduced and society run helping events to help first years. Unfortunately, the engagement from first years has been poor and my and staff continual attempts to encourage them have been ignored but from our standpoint, it is positive the staff have implemented these sessions and heard the students feedback.</p>
<b>Plans for next month</b>	<p>We have our first staff/ school meeting which will serve as an introduction to most of the reps. We are encouraging the feedback given to be both positive and negative as last year the meetings were led to be a bit of a complaining session at times. I hope I can set a good example and we can all push forward to set the foundations for a strong year.</p> <p>I am also planning to help introduce the respective students to their year leaders in a more formal manner to help them build up a relationship. This will help them create feedback loops rather than just all the feedback being funnelled back to me.</p>
