

Full Name	Jack Eames
Year of Study	4
Rep Role	College Officer - Science
What has been worked on in the past month?	The school reps and myself have been ensuring that the transition back to online learning has been as smooth as possible - e.g. ensuring all content is on blackboard, lecturers are still contactable, online lectures are replicating in-person ones, etc. This has been the majority of our focus for the past few weeks.
Successes from the past month and any Reps Wins	There has been some changes to the university's website in response to the 'STEM for all' campaign - the school of computer science webpage is now equally balanced in response to our comments and less like a 'boys bedroom'. There has also been subtle but noticeable changes to the college of science page, and other schools within it, making them more gender balanced and overall more inclusive.
Plans for next month	Next month will see a focus on the transition of students back to campus, and the tied transition back to in-person lectures. Once again we want this to be as smooth and transparent as possible.
