

Volunteer Officer Report February 2020

Jacob Diameh – Postgraduate Taught Students' Officer

What has been worked on in the past month?

1. I attended the College of Science Academic Board meeting which was to discuss the progress and plans for the college. There was a forum on how academic research should be treated and how to go about it for all students.
2. I attended the Academic Affairs Board Meeting held to review the various modules for the next academic year. It was successful as we all contributed to the progress of having most of the courses and modules reviewed.
3. Also attended the Management Cohort Meeting to discuss issues facing the course and how to make it more effective and academically viable.

Successes from the past month and any Reps Wins

Most of the timetables issues raised in last Speak week are resolved and after some dialogues with several students, they are happy about this semesters timetable schedules.

Plans for next month

I am invited for the upcoming event on Hate crime reporting which I will share my experience and that of others I have been in contact with.

I will be attending the University Lincoln welcome event, which I will be contributing as the PGT Officer.
