

Volunteer Officer Report November 2019

Angelica Dahil – Medical School Rep

What has been worked on in the past month?

On the past months, I have been working on improving the quality of teaching and facilities provided for the new medical students. These new proposals and suggestions have been reflective upon the comments and feedback given by fellow students.

Successes from the past month and any Reps Wins

Over the past month, we have finally been able to find a chair that has smaller dimensions but still keeping the comforts, to theoretically enable more space in the INB1103 room. These final decisions are yet to be fully confirmed with the whole medical school cohort.

We have been particularly successful in communication, especially with ideas on starting up a new medical school society (not MedSoc). Most of the students in the cohort are now engaging and collaborating more with the rep team! Great!

Plans for next month

Next month, I plan to continue gathering more ideas for the medical society and hopefully start one up.

I am also eager to find ways by which I will be able to improve cultural awareness and help those from diverse backgrounds, due to small minorities in my cohort.
