

## **Volunteer Officer Report October 2019**

Jack Eames

### **What has been worked on in the past month?**

I've been working with the deputy head of the school to help implement a new idea of 'mentoring'. It would mean that you'd be able to be mentored by someone in the year above, whether it's to do with academia or how to approach applying for postgrads/industries, and we are hoping that this will help boost confidence and skills within the school.

### **Successes from the past month and any Reps Wins**

We were able to start the process of getting the module for semester B of the biochemistry changed from 'current issues in biochemistry' to 'topics in biochemistry'- the module structure is the exact same, it's just that the coursework is broken up differently.

### **Plans for next month**

I'll be moving forward with the mentoring plan and begin recruiting people who are interested in it, and if they'd want to be mentored or become a mentor.
