

Volunteer Officer Report November 2019

Callum Inkster – School of Architecture & The Built Environment Rep

What has been worked on in the past month?

This month I've worked on finalising the studio redesign layout, then worked on getting a survey created which has been shared out during lectures to determine if we're going ahead with the redesign.

Successes from the past month and any Reps Wins

The survey is finally created and has been shared out to the necessary students. During our speak week, each year had a feedback session during one of their normal lectures. The first year reps took it upon themselves to minute each piece of feedback and compile it into a document separated by topic

Plans for next month

To analyse the student feedback from the speak week and further the progression of the course.

Get the redesign approved by health and safety before putting the redesign into effect. Acquiring and setting up the new guillotine. (Supposedly the A0 guillotine was bought a month ago but it has yet to appear)
