Vice President Wellbeing and Community  
August 2020

<b>Report Summary</b>	Over the last month the Sabb team have been working hard to begin implementing their KPIs for the year, if you're interested in what I have been doing I tell you all about it in this month's Officer Report. We have also been preparing for students to return to campus and have finished our training with a 3 day residential full of team building and planning!	
<b>KPIs</b>	<b>Updates</b>	
70% of students feel that they have access to mental health support and would feel comfortable using it	<b>Progress this month:</b>	I have been working with advice to ensure students are aware of our advice centre and what support we offer. We are working to recruit wellbeing champions who are key to this KPI.
	<b>Plans for next month:</b>	Over the next month I plan to work closely with the advice centre to train Wellbeing champions in their roles and then provide them with further opportunities to volunteer to support student mental health. I also want to work with advice to assess which demographics of student are less likely to access advice and work with advice to ensure all students feel comfortable and confident in accessing the service.
Implement a Students Union housing accreditation scheme and letting agency	<b>Progress this month:</b>	Over the last month we have been working hard to ensure the scheme is ready for when students return to campus. I have worked closely with students by holding Housing Focus groups, which have allowed us to best understand what students want from their houses. I have also been working closely with our Advice centre preparing materials for students containing advice on how to rent.
	<b>Plans for next month:</b>	Over the next month I plan to continue to work closely with all the staff involved in the accreditation scheme to ensure we are ready to launch the scheme for students in September. I will also be continuing to work with advice to create documents for students on their renting rights and housing advice.
75% of students are aware of how to access sexual health	<b>Progress this month:</b>	I have been working hard on SHAG packs, which have unfortunately had to take a back seat due to the current government guidelines. However, that has not dampened

provisions and education.		my enthusiasm! I have had a meeting with the campus health centre and I am keen to work closely with them to provide sexual health information and testing to students. I have also been working with advice to arrange the implementation of plastic free sanitary items on campus for students, in order to be more environmentally friendly.
	<b>Plans for next month:</b>	I hope to continue to work with advice to finalise the arrangements and make plastic free sanitary items available for students on campus when they return. I also want to make contact with LISH with the aim to work closely with them to provide increased STI testing on campus and to implement 'at home' testing kits and contraception for students.
Successfully launch the community map by November 2020	<b>Progress this month:</b>	I have been having meetings with members of the campaigns network to get their input for the community map to ensure different student demographics are involved in the planning stages. I have also been working on a proposal to implement sunflower lanyard on campus and hope to run a trial in October.
	<b>Plans for next month:</b>	Over the next month I hope to meet with more students to discuss the community map and how it can best represent different groups of students, with the hope it will be a useful resource for students when the return to campus.
80% of Students feel that the Students Union supports their health and wellbeing	<b>Progress this month:</b>	I have worked closely with the advice centre to assess areas that students often require more support in and have put together a plan for the website update. Due to other projects we have put this on hold until the future, however we continue to assess which information is the most beneficial to students.
	<b>Plans for next month:</b>	I hope to work with wellbeing to begin to write the content for the update, which will allow students to access information, even if they do not feel ready to contact the advice centre.
	<b>Progress this month:</b>	Over the last month we have been working hard to implement the wellbeing network and

70% of students are aware of the Wellbeing network		we are currently recruiting volunteers for the three lead wellbeing champion roles.
	<b>Plans for next month:</b>	Over September myself, along with the Advice centre plan to recruit the 3 lead wellbeing champions and provide training to them. We also plan to develop each role so they have the correct tools to successfully undertake their roles and support students.

<b>Student Interaction update:</b>	Meetings with campaigns network to discuss the community map, Clearing open day Facebook lives and our first Facebook live as sabbatical officers, housing focus groups and a catch up with Callum to discuss housing, his plans for the year and the community map.
<b>Committee and University Staff updates:</b>	A mentor meeting with Julian Free, a catch up with Jaqueline mayor an the student support services, meetings to discuss welcome week and students return to campus and the Clearing open day Facebook Lives done in partnership with the university.
<b>Any Other Business:</b>	I have finished implementing the SUGgestion requesting an ask for Angela system in The Engine shed- for this training for our student staff has been created and marketing are currently working on materials to be put in our venues toilets when students return in October. The scheme will be available in all our venues, not just The Engine Shed.
