

Wednesday Afternoon Report Executive Summary

This year, students once again requested that the Students' Union investigate the issue of timetabled sessions on a Wednesday Afternoon which were hindering their participation in BUCS Sports Fixtures, something which can lead to development of skill such as teamwork and leadership or management.

As a Union, we created two questions to ask BUCS team members with regards to their current timetable and whether this prevented them from engaging with BUCS fixtures. Over 30% of these members completed the questions presenting us with evidence which showed which modules held timetabled sessions on a Wednesday after 1pm. This evidence is included as Figure 1 in the document below.

Additionally, we were able to use this evidence to look into what types of timetabled sessions were scheduled during this time on a Wednesday Afternoon. There was a level of expectation that these sessions would be those that needed specific resources for education purposes i.e. lab space or studio space. This however, was not the case and that it was almost "generic" teaching sessions that were timetabled after 1pm on Wednesdays.

Further to this evidence, we also gathered information from administrators within Schools to investigate how they approve timetable change requests and what reasons can be given for these. We discovered that most requests need to be made within the first few weeks of term and changes would be allowed as long as group sizes did not exceed a limit or reduce to an impractical size. We found that the majority of Schools would agree to a timetabling change request due to needing to take part in a BUCS fixture on a Wednesday afternoon, but that this was not centrally considered a formal reason for request.

Timetabled sessions on a Wednesday Afternoon is something that is mentioned as an issue almost annually by students who are wanting to engage in different opportunities. In order to protect BUCS fixtures in the future, we would like to work towards the removal of timetabling on a Wednesday Afternoon in the future. To take steps towards this we as a Students' Union make the following recommendations:

- 1. Include Wednesday BUCS Fixture as a reason for a change in timetabling request.**
- 2. Timetabled sessions that do not need an equipment specific room to not be timetabled on a Wednesday afternoon i.e. post 12pm.**

3. No compulsory lectures are timetabled for a Wednesday afternoon i.e. post 12pm.

Wednesday Afternoon Report

Nationally, Universities and Colleges represent and compete in competitions with the national governing body for HE sport in the UK, the British Universities and Colleges Sport (BUCS). Across the country games take place on a Wednesday afternoon, alternatively known as BUCS Wednesday, with over 170 institutions taking part including University of Lincoln Students' Union. BUCS conducted research in 2013 to show the link between involvements in Sports at University with a higher success rate for employability once graduated from University. Primary Research in the form of a Graduate Survey showed that graduates who had taken part in sport at University had a salary around £32,000 compared to a salary of £26,000 for those who had not engaged in sport¹. Not only can it be beneficial in graduate salary but also skills students gain such as; time management, financial experience, leadership and teamwork to name a few. In a world where a degree is not enough anymore, this is something to be aware of. Currently at Lincoln, approximately 525 students are a member of BUCS competing sports at Lincoln, and on Wednesdays we have up to 45 teams competing and representing Lincoln against other institutions.

Over the past few years, student members of Sports teams have reported issues to the Students' Union regarding timetabling clashing with their games as a member of a Sports Team, a fact which has continued this year. It was raised at the Student's Union Sports Committee, a body compiled of all Sports Club committee members, where it was requested that Sammi Storey (VP Activities) looked into the scope of the issue this academic year.

In late November 2015 we asked sports members to answer two questions:

- "Do you think Wednesday afternoon should be kept free?" (Required)
- "Do you have a module which schedules compulsory teaching on Wednesday afternoon?" (optional)

There was a total of 193 respondents to these questions, which is the equivalent of 36% of students who are a member of a competing BUCS Sports Club. 187 (97%) of

¹ Sheffield Hallam University and Sport Industry Research Centre with BUCS, "*The Impact of Engagement in Sport on Graduate Employability*", Final Edition June 28th 2013, <
<http://www.bucs.org.uk/page.asp?section=18560§ionTitle=Value+of+Sport>. (accessed February 2016).

respondents answered "Yes" to the question about whether Wednesday afternoons should be free. Within these responses, 51% declared that they had at least one compulsory teaching session on a Wednesday afternoon. The remaining 46% (92) of respondents selected "Yes" to the question "Do you think Wednesday afternoons should be kept free?", but did not provide module examples that had teaching sessions on Wednesday afternoons. These respondents may have answered in this way in order to protect their future fixtures and timetabled sessions.

Students at the Sports Committee who had actioned the VP Activities to look into the scope of this issue had requested for Wednesday afternoons to be free of timetabled sessions.

6 respondents (3%) answered "No" to the first question, and all but one of these students did not have compulsory teaching sessions on a Wednesday afternoon, which is highly likely why they responded this way.

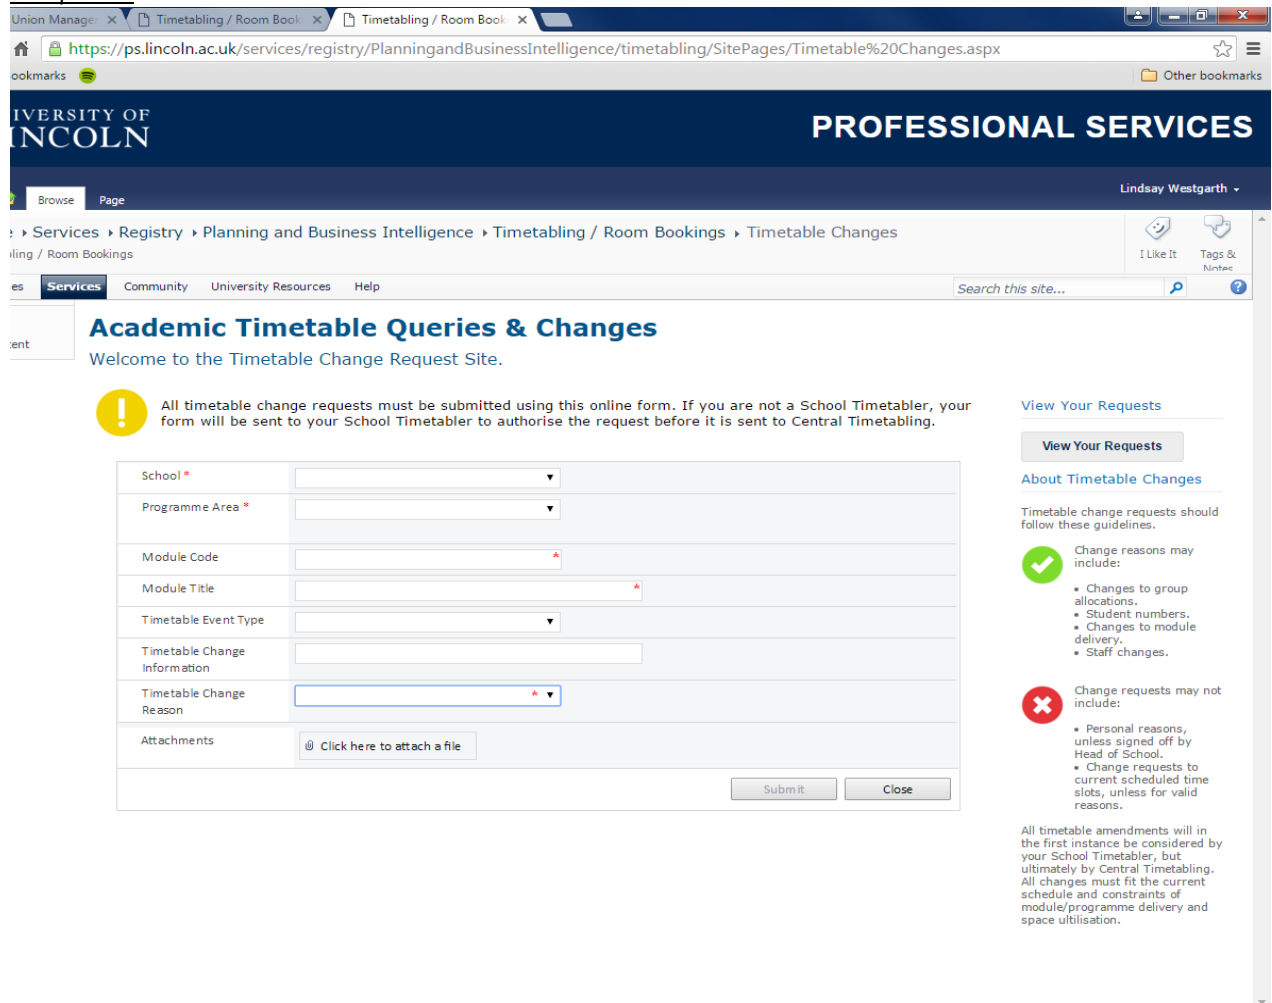

The results of the survey showed that there were 103 modules (as shown in Fig. 1 which can be found at the end of this document) across all levels of study with timetabled sessions on a Wednesday afternoon. These sessions prevented a total of 156 students from taking part in extra-curricular activities at that time. Whilst the research was underway, we were informed by colleagues within Student Affairs that most timetable issues may be due to issues with lab space. Due to this information, we assumed that the results would show that modules affected would be within the College of Science. The table of the modules, however, show that it was not just science subjects or modules that were affected.

Using information on the University timetabling page on the Portal site, we have been able to find out what type of teaching was held at these times for modules, which can be seen in Fig.1. The method of teaching seems to vary from Lectures to Seminars or IT Lab Sessions. We understand that lab sessions may need to be at this time due to resource however, we would push to have teaching that only occurs once a week, such as Lectures, to be timetabled before Wednesday 12pm.

For other teaching which happens on Wednesday afternoons such as Seminars, Workshops or Practical's, we would request that students be able to change these sessions, where there are other timetabled sessions of the like in the week, to enable these students to take part in BUCS Wednesdays. This may mean that the group that they are allocated to is changed e.g. from Seminar Group C to Seminar Group A.

The Central Timetabling Department within Planning and Business Intelligence have created a Central Seminar Change request form which can be found on the portal.

Fig. 2 Screenshot of the Central Timetable Change Request.

Colleagues confirmed that this form was created on behalf of schools but use of it varied from School to School. Once a student has submitted a change request using this form, the administrators within Schools are notified but from then it can be an informal route or a Head of School route. Currently the "Timetable Change Reason's" are listed as:

- Student Numbers
- Staff leaving/Illness
- Clashes
- Changes to programme delivery
- Specific staff related timetable change
- Room
- Other

Research within each School through administrators showed that there was indeed a varied use of this form, with many suggesting students don't know about this form or can't find it when directed.

Within the School of Architecture and Design, the Architecture division has not received any requests through these methods. If there have been changes requested, these have been through informal methods for personal reasons, or one or two were for BUCS fixtures at the beginning of term one.

Within the School of English and Journalism, they have an allotted period of time to request a change of seminar and are flexible to make any requested teaching changes that students make during this time period if the numbers within groups will allow. Most common request is due to the need to work their job alongside studies but they have also received requests to change due to taking part in sport on Wednesdays which have been allowed. If the request is unsuccessful, the school will inform the student as to why this is, for instance due to seminar group numbers or a clash with timetabling for a different module. If a student wishes to change their teaching after this point in the term, this would tend to be through the tutor teaching. This appears to be the same process within the School of History and Heritage and School of Film and Media.

Lincoln School of Fine and Performing Arts, do not tend to receive requests for teaching changes due to the number of practical sessions that they deliver. They do not tend to use the central form due to the performance and practical sessions needing to be approved by a programme leader. The request is then forwarded on to the administrator to change if necessary. The school tries to accommodate all requests, including any involving sport, but cannot go over group set numbers.

Within the School of Chemistry, administrators do not receive many requests generally or for students who are part of BUCS teams. If they do receive a request, it is over email and then a discussion is had between the administrator and module leader to seek advice as to whether the change is practical for the seminar groups affected.

The School of Computer Science use the central system on the portal which they direct students to if they are approached about a potential change request, so that they can monitor all applications from students. Most change requests are made within the first month of term and will be accepted for work or other genuine reasons if they can receive proof of the requirement e.g. a work schedule. BUCS Wednesday requests are usually accepted and met where practical, due to the tradition of keeping Wednesday afternoons free for Sports and Societies. The School did raise concerns that in the future this may not be possible due to the high intake of students predicted, as this will limit places in teaching sessions, [resulting in potential - as well as potentially resulting in](#) timetabled sessions on Wednesday afternoons.

In the School of Life Sciences, the students do not tend to use the form that is hosted via the Portal site, students will email administrators directly if they have any problems who will then input the request for them. Staff could not remember a time when there had been a practical session or seminar change request declined unless it had clashed with another aspect of the student's timetable. This school also

commented that they had previously received requests for changes due to sporting commitments.

In the School of Maths and Physics, staff have not received timetabling change requests directly nor any academic query or change forms over the last academic year. However, students have raised timetabling or room issues faced during their School Subject Committee Meeting this year. This has included requesting to have Wednesday afternoons free in order to attend Sports games or Societies. As a result, Programme Leaders have made changes with Timetabling where this was possible.

The School of Health and Social Care had a different response when compared to other schools. As the programmes are already set and don't have multiple choices for seminars, they do not receive change requests from students. If a student on these courses was to raise a request, they would need to do so through the portal and provide a strong reason to do so. Additionally, on these types of courses, sporting activities on Wednesdays would not be taken into account due to placements as it is not feasible to do so. Currently there are no weekly occurrences of teaching on Wednesday afternoons.

Within Lincoln Law School, their approach is to be open to requests from the portal, email or face to face, much like some of the other schools previously mentioned. Generally, although staff can request evidence from students, they feel that when there is a request for a timetable change there must also be a genuine reason. This approach is to encourage students to have the teaching style they require amongst other reasons in order for them to attend and engage in a session. The only reason for refusal is if the seminar group is full or if requests are later than the two weeks at the start of term due to the fact groups will have engaged together by this point. Currently within this school, there are no timetabled classes on a Wednesday afternoon.

The School of Sport and Exercise Science main requests are for seminar/lab group changes or changes of their options, although they do not receive a high number of requests for these. As with other schools, changes are submitted through the portal request page or directly with an administrator or other member of staff. If it is made within the first few weeks of term, then the change is usually allowed. There is a need to keep the various groups to a balanced size so will deny a request if there is not enough room to facilitate the student within the groups. If the request is after the first few weeks of term, then administrators will always check with tutors to ensure that no group work has begun and it would not affect the group too much. The School will try and accommodate most reasons such as childcare or use of public transport to attend University, which may lead to a check of the public transport used or route travelled to find out the accuracy of the information. Change requests within this School are not usually agreed for part-time work commitments and any other reasons are considered subjectively. If the School cannot accommodate the initial request but the reason is valid then they will try to make an alternative change to the timetable to improve it for the student. If there are still issues, then there may be a suggestion to swap with a student in another module who may be facing the same issue or to change options but this does not happen very often. At the moment, the School of Sport and Exercise Science do not receive or facilitate any

change requests due to BUCS fixtures as they do not have any Undergraduate timetabled sessions on a Wednesday afternoon.

Unfortunately, there were no responses from colleagues from Business, Social and Political Science, Psychology or Engineering.

As can be seen from the input of administrators from Schools across the University, there is a range of flexibility in order to accommodate student timetable requests unless impractical to do so; the class is already filled or there are not enough facilities in rooms such as Computer Labs. There also appears to be in each school a willingness to allow timetabling changes for the reason of BUCS Wednesday fixtures as long as it's completed within an appropriate amount of time. Other Schools that don't appear to do this at the moment are those who do not currently have timetabled sessions on a Wednesday afternoon or due to placements, however, this may not always be the case as the University grows. For this reason, the Students' Union would ask the University to include the reason of BUCS Wednesday fixtures as a reason for an authorised timetable change request within Schools, and to be included on the form shown in Fig. 2 created by the Timetabling team.

In order for this to be accepted, we at the Students' Union understand there must be a level of proof to show that a student is a member of a BUCS competing sports team. Currently being accepted as evidence is the receipt of purchase that a student retains from joining the Sport Club, however we are aware that not all students may keep this. For this reason, we are introducing the potential to allow for staff within schools to contact the Sports Assistant role within the Students' Union for confirmation of membership to a Sports Club should the student not have their receipt of purchase.

To conclude, students have brought to the Students' Union attention that they have faced problems with regards to their timetabled sessions of teaching on a Wednesday afternoon preventing them from engaging with their sporting commitments to represent nationally. After talking to colleagues within Schools across the University, we have found that most schools will allow changes on their course within reason, accepting Wednesday BUCS Fixtures as a reason for the adjustment to timetabled sessions for students if they wish to change. However, on the formal process, this is not included as a reason. We recommend that the University:

Include Wednesday BUCS Fixture as a reason for a change in timetabling request.

The information of what types of sessions are timetabled on a Wednesday afternoon in Figure 1, show that some of the issues are to do with a need for a specific room, for example an IT lab space. However, this was not the case for all sessions named by respondents to us. For this reason, we would recommend that:

Timetabled sessions that do not need an equipment specific room to not be timetabled on a Wednesday afternoon i.e. post 12pm.

Finally, it can be seen in Figure 1 that there are a number of lectures on a Wednesday afternoon. These occurrences do not allow for students to engage in their sporting commitments due to lectures for each module typically only happening once per week for each module. For this reason, we would recommend

that:

No compulsory lectures are timetabled for a Wednesday afternoon i.e. post 12pm.

Fig.1.

Modules named by students as conflicting with Wednesday Afternoon Sports commitment, with courses and number of respondents affected as well as what type of teaching it was

Module	Level of Study	Course(s) Affected	Respondents affected	Type of Teaching
BGY1008M	1	BSc Biomedical Science	2	Lecture (wk 23)
