Full Name	Talia Rose Adams
Year of Study	2
What has been worked on in the past month?	This month I have been involved in training to prepare me for my role whilst helping the new School Rep for Psychology settle into their position. Part of this has involved helping the School of Psychology prepare for blended learning by giving academics student perspectives alongside the new school rep, such as attending the ADAPT workshop. More widely I have attended a CoSS International committee meeting and a DESG meeting. As well as this, I undertook training for a new panel that will look to help academics finalise their modules with student input. Finally, I arranged a meeting with the CoSS School reps so we could all introduce ourselves and I could pass on some tips for the year. We also started to talk about things we would like to do this year too which was exciting.
Successes from the past month and any Reps Wins	I was able to provide a few valuable points of student insight during the DESG meeting in regards to plans for blended learning. I have set up communication streams with the new School Reps within the CoSS to ensure everyone can easily get in contact with each other. I have started to discuss possible plans for the coming year which have received good feedback so far.
Plans for next month	I am looking to contact academics to start to plan ideas for the coming year to ensure we have enough time to prepare. I will be keeping in contact with the CoSS School reps to make sure they are all settling into their roles. Hopefully I can help any academics that would like student input on blended learning. Lastly, I want to continue to work on looking at ways we can create the feeling if community on digital platforms for

students.
