

Volunteer Officer Report February 2020

Jake Muff – School of Maths & Physics Rep

What has been worked on in the past month?

This month I have worked on streamlining feedback from exams and assignments as well as making sure that modules are working as intended in the first part of the semester. I have had multiple meetings with the Director of Education, Marco Pinna to ensure that things are being communicated correctly across the years.

Successes from the past month and any Reps Wins

We had our first subject committee meeting on the semester, which provided excellent feedback on what's going on across the years in our subjects.

Plans for next month

My plans for next month is to tie in with other Schools in the College of Science to see how they're doing and communicate at a College level.
