

Volunteer Officer Report February 2020

Jack Eames – School of Life Sciences Rep

What has been worked on in the past month?

Ensuring that all students were happy with exam/coursework results, and if not signposting them to where they can challenge their grades.

Successes from the past month and any Reps Wins

School action day was a success! Got great feedback on programme revalidations and what could be improved on modules from last semester.

Plans for next month

Hoping to implement workshops for CV building and job applications for students (primarily third year or postgraduate students) so they have options for when they leave university.
