

Volunteer Officer Report October 2019

Terence Bullen

What has been worked on in the past month?

This month, I had my first meeting with the Head of School and discussed many course specific and school-wide issues (with, of course the help of my reps) - as well as further exploring the ideas for the SoD end of year ball.

Successes from the past month and any Reps Wins

I think this month has been super productive - I've sat in course meetings and brought a lot of issues forward. Some of these include opening a new paid student role for maintaining social media (soon to be trialled on Creative Advertising), raising subject-specific academic reading, and also carrying on the process of making studio spaces more comfortable, in regards to aircon/heating and cleanliness. There's also an agreement to try and find initiatives that bond the whole school as one cohesive group - watch this space!

What I've seen that's really great is that a lot of SoD course reps are taking great initiative and trying their best to solve issues autonomously.

Plus it's been great to finally meet most of my reps!

Plans for next month

I intend on following up any withstanding issues raised this month - some issues are more pressing than others, and I really want to ensure that everyone, at base level, is able to find appropriate working space, getting adequate teaching time etc.

Again, exploring into the practicalities of SoD End of Year Ball - exciting times lay ahead!
