
Full Name	Jack Eames
Year of Study	4
What has been worked on in the past month?	I've finalised the three main points that I want to work on throughout this academic year: STEM for ALL campaign, school Diversity Leads, and better relationships between schools. A plan is being developed as to how all of this will be implemented and completed over the next year, especially with a decreased presence on campus. A lot of planning and thought is needed for this to run smoothly and the CoS school reps, CoS senior staff, and myself are working to ensure this happens. I have also now been invited to sit on the inclusion committee within the CoS - this will allow me to gain a better idea of inclusion issues that still remain within the college, as well as what they're doing to work on this.
Successes from the past month and any Reps Wins	Senior staff within the college and the school reps are extremely excited to work on the ideas being proposed, and small steps have already been completed in preparation for these ideas to come to fruition. I've also been networking more within the CoS in order to get more staff members aware and onboard with what we're working towards - they've also suggested some brilliant ideas.
Plans for next month	As it draws closer to students returning to university there is going to be a lot of apprehension about what this year holds, therefore I intend to send a college wide email to all students introducing myself and the senior reps, alongside their contact details - hopefully this will fill new and returning students with a bit of confidence that they have someone who they can approach. I'll also be continuing to work on the goals I've set out for this year.
