

## **Volunteer Officer Report October 2019**

Holly Tyers

### **What has been worked on in the past month?**

In the past month I have focused on contacting relevant University and Students Union staff for my main two campaigns, in order to determine the content, dates and practicalities of both. I have come across a few issues during this but most have been resolved, and I am working towards those that haven't.

### **Successes from the past month and any Reps Wins**

My main success of this month was finalising the content for my campaign in February, as it is a cause I am particularly passionate about. I have also learned a lot about the ways that the University and the Students Union are improving with regards to sustainability, in particular from my discussions with the newly elected Environmental Officer.

### **Plans for next month**

Over the next month I plan to meet with sports and societies to discuss the campaign and the ways that we can work together, in order to make the February campaign as impactful as possible. I would also like to collaborate with other officers on a campaign in December, and therefore I plan to meet over the next month to discuss this aim.
