

Full Name	Angelica Dahil
Year of Study	2
What has been worked on in the past month?	In the past month, I have just been attending meetings to go over and finalise plans we have for this year. I was able to attend the Course Management Committee last week and got involved with the discussions. It was great to see the Medical School equipped and prepared to start the new academic year.
Successes from the past month and any Reps Wins	I have finally completed creating an instagram account for my role (@lincoln.medicalrep)! I have gotten a lot of engagement since I posted a video to introduce myself and hosted a Q&A on my story, I was very happy to receive lots of questions from students!
Plans for next month	Next month, I am planning on working with the other School Reps within the College of Science to find ways we as a college can become more integrated and host events that will get students from different schools involved. With the current situations, it will be quite a challenge to host events in person, so I am aiming to speak to them and gather ideas on how I could do this. Within the next few weeks, another Course Rep elections will be held within the Medical School too. So, I am very excited about getting students involved in the election process! When the Course Reps for this year is finalised, I am looking for a way to arrange a session with the entire cohort of each year separately to introduce myself and their specific Course Rep!
