
Full Name **Oliver Bramhill**

Year of Study

What has been worked on in the past month? This month we had our subject committee meeting where we managed to clear some things up regarding individual modules happening midway through the second semester. I also worked on keeping students informed about the situation regarding COVID-19.

Successes from the past month and any Reps Wins Last month we were successful in keeping the students updated regarding the Coronavirus Pandemic as well as ensuring a smooth transition into online teaching and learning, holding virtual meetings as a rep group. Some key changes have already been made to the delivery of certain modules such as Advanced Topics and Scientific Computing.

Plans for next month Next Month I plan to hold an online Microsoft teams meeting with all the reps in order to keep them updated and for them to ask any questions or update me on any concerns the students have.
