

<b>Full Name</b>	Angelica Dahil
<b>Year of Study</b>	2
<b>What has been worked on in the past month?</b>	<p>The past month been progressing fairly smoothly. I have been working on announcing and making students aware of the Course Rep elections. After the elections finished, I did not have any course reps for the 1st year, which definitely worried me. Fortunately, after re-iterating and encouraging this to the 1st year students, several students reached out to me and nominated themselves. Now, I have a complete team of course reps!</p> <p>The course reps have been undergoing their training and are getting familiar with how the SU works and their roles. During the past weeks, the elected course reps have been very pro-active in gathering student feedback to find out how they're currently finding the course, ready for our first Learning Committee Forum!</p>
<b>Successes from the past month and any Reps Wins</b>	<p>Successes:</p> <ul style="list-style-type: none"> <li>- I now have a full team of Course Reps, which is great as there will be a clear representation of the entire medical cohort.</li> <li>- In addition, all of them have completed their training modules :)</li> <li>- I will be co-chairing our first Learning Committee Forum meeting for this academic year with a full team</li> <li>- Course reps have collected numerous feedback from students ready to be discussed at our LCF</li> <li>- I have been keeping myself updated with my Instagram account for the weekly Q&amp;A, Top Tip Tuesdays, and responding to any questions or queries.</li> </ul> <p>As a personal achievement, I am particularly proud of myself in getting myself active again. The past few weeks have been difficult to keep being motivated and full of energy. But, I pushed myself to become more active, this has definitely helped me revive my energy, focus, and concentration!</p>
<b>Plans for next month</b>	<p>Next month, I am aiming to enhance the visibility of my Course Reps! One of the ways is to promote them through my @lincoln.medicalrep Instagram account, which has proven to be a very effective platform in getting information reached to many students and keep them updated. Hopefully, this will help get their faces and names out there!</p> <p>For our 1st LCF meeting, I am planning to work on items suggested by students such as:</p> <ul style="list-style-type: none"> <li>- the possibility of subscription/student packages to Osmosis or Kenhub for students</li> <li>- seeing if more revision sessions and/or practice questions could be made for the OSCEs, the upcoming anatomy spotters, etc.</li> <li>- identifying the study space available for students</li> <li>- getting more information for the Year 2 students with regards to the BMedSci</li> </ul>

---

Others:  
I'll keep working on my Instagram account :)
