Volunteer Officer Report October 2018

Madie Bogosian – School of Sport & Exercise Science Rep

What has been worked on in the past month?

In the last month I attended my schools rep training to introduce myself to all of the reps and let them know what my plans for the future are and how they can get involved in this. I had a chat with them to make sure they understood their role as a rep and informed them on how they could get in contact with me.

I attended my colleges academic board meeting where I got the chance to discuss the plans I have to develop the schools community and thus improve our NSS/TEF scores. TEF is something that I really want to focus on improving this year.

Finally, I attended the rep forum and introduced myself to more new reps that I haven't previously encountered. Positive relationships were built at this form between all the reps that attended. (All Level 1 reps, except 1 Level 3 rep). We discussed the reasoning behind TEF and discussed the scores from the previous year. From this conversation we began to develop the idea of setting up an academic society in the near future. There were a lot of positive actions from the level 1 reps which should help in getting the society up and running.

Successes from the past month and any Reps Wins

There is a lot of success coming from the idea of an academic society being created. A lot of great ideas have been discussed among reps and students, as well as promoting the benefits of having a society.

Plans for next month:

Beginning to gather more feedback from the reps and students around the TEF questions. identifying the strengths of the course, and anything that can be worked on in the near future.

Further plans to develop the sports society will be undergone. This will involve me meeting with the VP Education to discuss the demands of the society and further development. I will then meet with the Reps who volunteered to take the lead in organising a society and discuss actions for the future. This will be monitored by me to ensure it keeps moving forward.
