

## Volunteer Officer Report November 2018

James Bayliss – College of Science Officer

What has been worked on in the past month?

Over the last month I have attended multiple meetings from academic board and program leader lunch to TEF meeting with Liz Mossip. I have been working on TEF reports with the school of life sciences. I have also attended student engagement networking event which was a good chance to find out best practices from each school from around the university.

Successes from the past month and any Reps Wins

One success of the last month was the feedback received from the foundation year to hear how they are getting involved with their relevant schools. Another success was amazing Rag Jam put on by the game development society raising over £700.

Plans for next month

The plan for the next month is to meet with the presidents of the academic societies within the college to see how I can support them best.
