

Volunteer Officer Report February 2019

George Young – Environmental Officer

What has been worked on in the past month?

In the past month the committee have been working hard on plans for our upcoming week of environmental themed events! The Officer has attended the environment and sustainability meetings along with university staff and have meetings with the SU regarding student feedback.

Successes from the past month and any Reps Wins

On Monday 18th February, we had our first event - a political panel discussing environmental efforts. This event was open to the public and was an amazing success. We are very excited to do more of these in the future.

Plans for next month

Next month holds our eco week and this will be our main focus. We hope to engage not only students, but staff and the community too.
