

University of Lincoln Students' Union Volunteer Officer Report

DATE

School Rep for Sport & Exercise Science

What has been worked on in the past month:

This month I have worked on the creation of a social committee to run a community event for the end of the academic year. Myself along with three students and two members of the staff will be running this committee and if it's successful the next school rep can take over and make the events bigger.

Successes from the past month:

The success from this month has been working on the key areas from the school action day. For me personally the communication between students is the area I want to improve and now with the creation of a social committee we can as a school finally find a way to improve the communication between the students

Plans for next month:

The plans for next month are to firstly plan and hopefully deliver this community event. After receiving an update from the student life team about the creation of our student hub website I am hoping that we can get a finalised creation of what the website will officially look like at launch.
