

Volunteer Officer Report November 2018

Peter Cseik – School of Maths & Physics Rep

What has been worked on in the past month?

During the past month the first college level TEF report has been submitted, with overwhelming positive feedback from students across this school. Me and the course reps have been working together to sort out some minor issues regarding a module – style of lecture notes and having worked out whiteboard examples uploaded to BlackBoard.

Some research has been done in all years in collaboration with the course reps, and an overwhelming majority of students would like to have lecture recordings.

This month I have attended Student Committee where we worked together with course reps and staff to identify key issues within the school and create an appropriate action for them to be solved. I have also attended Academic Board, where I gave a quick recap on what I have been doing within the school.

The school has also organised its annual Christmas party for students, which will be taking place on the 11st of December this year.

Successes from the past month and any Reps Wins

- The remaining open course rep positions have now been filled
- Student Committee has been a huge success for solving issues, with some changes already starting to be implemented
- Most of students' issues regarding certain modules have been resolved

Plans for next month

- Module evaluations are coming out soon, and I am aiming to gather 100% of students' feedback, and to achieve this ambitious goal me and the course reps have made a game plan
- I am organising Action Day for the school in collaboration with staff members
- Trying to push lecture recordings a bit more, as there is a very clear need from students
- Follow up on any negative feedback gathered while researching for the pilot TEF submission
