

## Volunteer Officer Report November 2018

Emily Challis – School of Architecture & the Built Environment Rep

What has been worked on in the past month?

This month has seen major changes within the BArch course that have left students concerned about their studies. I have worked with the VP Education, our schools Director of Teaching and Learning, Head of School, and Head of College, to name a few, to come to a solution. This has allowed us to come to a solution where students have regained confidence in their studies, and the course can still see implementations that allow positive change.

Successes from the past month and any Reps Wins

This month I've worked with the librarian for architecture from the University Library to give the level 3 BArch students a workshop for how they can use the resources more efficiently.

Plans for next month

One of my main goals for this position was to try and bring a plotter back into NDH, and I'd like to start investigating how this can become possible as I've seen previous reports claiming there is no space on the fourth floor.
