

University of Lincoln Students' Union Volunteer Officer Report

28/2/2018

School Rep for Computer Science

What has been worked on in the past month:

The last month has been spent attending various meetings in the College of Science, and the School of Computer Science.

A lengthy meeting was held between myself and Yvonne James. This was to discuss the flow between the levels of programme within the School. This was extremely productive, with some very interesting conclusions drawn, which I hope will be raised internally within the School faculty.

Subject committee was held, in which the views of the students were made known to Programme leaders and higher.

Successes from the past month:

A student led survey was distributed amongst level 2 students. This was to gather thoughts and feedback on the L3 Project allocation, and the methods in which it should be carried out. The findings were significant, and have been provided to the School.

I have been conducting meetings with Reps regarding the Module Evaluation feedback gathered for Semester A. This was officially received mid-this month, with the full findings being released w/c 5/3/18.

A standardised mark policy for group work has been drawn up and is being tested in L2 Group Project. The results and findings of this policy will help ensure a fair weighting on student's marks.

Plans for next month:

Ensure Student Voice is heard in SoCS Teaching and Learning Committee.

Release the Module Evaluation findings from Semester A.

Push to raise the profile of Reps within the School, to help future SoCS School Reps.
