

## University of Lincoln Students' Union Volunteer Officer Report

DATE – 27/03/2018

### NAME OF ROLE

Accountancy, Finance and Economics

#### What has been worked on in the past month:

Over the last month there has not been a huge amount of work done as many people are hard at work on their dissertations/revising. However, keen to get back to work and continue developing the course more. Over the month though we did do some more work in improving the communication throughout LIBS as this is the key component that we must focus on as a team.

#### Successes from the past month:

Along with the work done to continue developing the communication within LIBS a few of the course reps have helped to make big changes in a few of the courses within our school (Mainly economics based courses) by creating the independent study core rather than optional due to nobody taking the option to not do one.

#### Plans for next month:

There are no massive plans over the next month as it is getting into exam season and we would like to slow down and focus on the smaller issues that arise as to not take focus away from exam preparation.
