

University of Lincoln Students' Union Volunteer Officer Report

31/1/2018

School Rep for Computer Science

What has been worked on in the past month:

The last month has been spent attending various meetings in the College of Science, and the School of Computer Science.

In particular, a meeting was held between myself and Luc Bidaut, Head of School, in which the future and culture of the school was discussed.

In this meeting, the need for transparency and clarity was brought up, to empower students in their learning. The need for students and staff to communicate about time commitments and scheduling was brought up, and both parties of the conversation realised this was an area for improvement.

The Computer Science Society was also discussed, and it was highlighted that to make best use of it, it should be openly advertised to all members of the school, and for them to host events covering material complimentary to the materials already covered in the curriculum.

Successes from the past month:

The Global Game Jam, hosted on 26th/27th/28th Jan.

Computer Science Society is happy to advertise across the School and INB.

Computer Science Society receiving and planning events with cross-disciplinary aspects.

Plans for next month:

Ensure that students voice is heard in Subject Committee.

Continue working with Computer Science Society to help them grow and continue the cross-disciplinary events.

Highlight to students the need for complete and honest NSS feedback.
