

## University of Lincoln Students' Union Volunteer Officer Report

26/03/17

### School Rep For Computer Science

#### What has been worked on in the past month:

The past month has been spent attending various college and school level meetings.

Time was spent advising on a new peer mentoring scheme within the school. This would be run by 2nd year students, helping 1st year students to properly adapt to university life, and fill the gap of support left between personal tutoring, student services, and the SU.

Academic rep reception was attended, with good turn out from reps. Interesting discussions were had in regards to student wellbeing and the student experience.

A meeting was had with Luc, Head of School, in which protocol and procedure was mentioned. The need for clarity and consistency was highlighted, a sentiment reflected by the module evaluations.

#### Successes from the past month:

The peer mentoring scheme will be a robust scheme, with a proactive, and forward thinking academic as it's lead. It will help integrate 1st year students into the CComp Sci community.

Overarching issues were raised with Luc, with the recent issues with in-class test being closely looked at.

Plans for next month:

Closely monitor the hand-ins and student moral to ensure a more bearable assessment hand-in period.

Raise the Peer mentoring scheme with incoming 2nd year students.

Ensure that hand-over is organised, for an easy transition in the new academic year.
