

Volunteer Officer Report November 2018

Michael Barton – School of Engineering Rep

What has been worked on in the past month?

Due to coursework season we are expecting IT to update ANSYS and the computers in INB2209 around Christmas to avoid interfering with students work. We have started initial talks about a Staff-Student Action Day with Dr Goher.

Successes from the past month and any Reps Wins

We have our new rep for "Mechanical Engineering - Control Systems".

Plans for next month

Organise the school action day for January the 15th. I have another meeting with the head of the school soon to raise any new issues.
